# Lucrări ştiinţifice publicate în reviste

1. Asupra tensiunilor termice în corpuri ortotrope în cazul deformării plane, An. St. Univ. Iaşi, Matematica, **11** (1965), 169-174.

2. Tensiuni termice într-un cilindru circular armat cu o tijă longitudinală din altmaterial, An. St. Univ. Iaşi, Matematica, **11** (1965), 347-356.

3. Tensiuni termice în corpuri anizotrope în cazul problemelor plane, An. St. Univ. Iaşi, Matematica, **12** (1966), 206-212.

4. Principes variationnels dans la theorie de la thermoélasticité couplée, An. St. Univ. Iaşi, Matematica, **12** (1966), 439-456.

5. Asupra teoriei termoelasticității neliniare, An. St. Univ. Iaşi, Matematica, **13** (1967), 162-175.

6. Sur la théorie de la thermoélasticité micropolaire couplée, C.R. Acad. Sc. Paris, **256** A (1967), 271-275.

7. Tensiuni termice în bare ortotrope, An. St. Univ. Iaşi, Matematica, **13** (1967), 451-461.

8. Tensions thermiques dans des barres élastiques non-homogènes, An. St. Univ. Iaşi, Matematica, **14** (1968), 177-203.

9. Tensions thermiques dans des barres élastiques anisotropes, An. St. Univ. Iaşi, Matematica, **14** (1968), 423-441.

10. On the plane coupled micropolar thermoelasticity I, II, Bull. Acad. Polon. Sci., Ser. IV, **16** (1968), I: 379-384; II: 385-390.

11. Sur la theorie de la thermoviscoélasticité couplée, C.R. Acad. Sc. Paris, **268** (A) (1969), 58-61.

12. Asupra deformării plane generalizate, Studii și Cerc. Matemat., **21** (1969), 595-609.

13. On the thermoelastic finite plane strain, An. St. Univ. Iaşi, Matematica, **15** (1969), 195-207.

14. On the linear theory of micropolar elasticity, Int. J. Eng. Sci., **7** (1969), 1213-1220.

15. Deformarea plană termoelastica ă mediilor neomogene izotrope, An. St. Univ. Iaşi, Matematica, **15** (1969), 463-470.

16. On the linear coupled thermoelasticity with two temperatures, Zeits. Angew. Math. Phys., **21** (1970), 583-591.

17. On some theorems in the linear theory of micropolar thermoelasticity, RevueRoum. Math. Pures et Appl., **15** (1970), 1181-1195.

18. Sur la theorie de la viscoélasticité micropolaire, C.R. Acad. Sc. Paris, **270**A (1970), 140-143.

19. Thermal stresses in the generalized plane strain of anisotropic elastic solids, Bull. Acad. Polon. Sci., Ser. IV, **18** (1970), 227-230.

20. On the plane strain of anisotropic solids in the theory of coupled thermoelasticity, An. St. Univ. Iaşi, Matematica, **16** (1970), 137-148.

21. Asupra tensiunilor termice în corpuri transversal izotrope, An. St. Univ. Iaşi, Matematica, **16** (1970), 149-166.

22. Existence theorems in the theory of micropolar elasticity, Int. J. Eng. Sci., **8** (1970), 777-791.

23. On the theory of coupled thermoviscoelasticity, An. St. Univ. Iaşi, Matematica, **16** (1970), 431-441.

24. On thermal stresses in plane strain of isotropic micropolar elastic solids, ActaMechanica, **11** (1971), 141-144.

25. Some theorems in the linear theory of coupled micropolar thermoviscoelasticity, Bull. Acad. Polon. Sci., Ser. IV, **19** (1971), 121-130.

26. Bending of micropolar elastic beams by terminal couples, An. St. Univ. Iaşi, Matematica, **17**

(1971), 483-490.

27. Existence theorems in micropolar elastostatics, Int. J. Engng. Sci., **9** (1971), 59-78.

28. Torsion of micropolar elastic beams, Int. J. Engng. Sci., **9** (1971), 1047-1060.

29. On Saint-Venant's problem in micropolar elasticity, Int. J. Eng. Sci., **9** (1971), 879-888.

30. Zginanie mikropolarnej belki wsporikowej obcia˙zonej momentami, RozprawyInzyn., **19** (1971), 371-378.

31. On the reciprocity theorem in the linear elastodynamics, An. St. Univ. Iaşi, Matematica, **18** (1972), 193-196.

32. A generalized theory of linear micropolar thermoelasticity (with E. Boschi), Meccanica, **8** (1973), 154-157.

33. On Almansi's problem for elastic cylinders, Atti Accad. Sci. Ist. Bologna, Rendiconti, **9** (1972), 128-139.

34. On the thermal stresses in beams, J. Eng. Math., **6** (1972), 155-163.

35. The plane micropolar strain of orthotropic elastic solids, Archives of Mechanics, **25** (1973), 547-561.

36. Almansi's problem in micropolar elasticity, Int. J. Eng. Sci., **12** (1974), 361-374.

37. On the positive definiteness of the operator of the micropolar elasticity, J. Eng. Math., **8** (1974), 107-112.

38. On some reciprocity theorems and variational theorems in linear dynamic theoriesof continuum mechanics, Memorie dell'Accad. Sci. Torino, Cl. Sci. Fis. Mat. Nat., Serie 4, n. **17** (1974).

39. On the second boundary value problem in the linear theory of micropolar elasticity, Atti Accad. Naz. Lincei, Rendiconti, Cl. Sc. fis. mat., **55** (1974), 456-459.

40. Bending of orthotropic micropolar elastic beams by terminal couples, An. St. Univ. Iaşi, Matematica, **20** (1974), 411-418.

41. On reciprocity theorems and variational theorems in linear elastodynamics, Bull. Acad. Polon. Sci., Ser. Sci. Techn., **22** (1974), 273-281.

42. Torsion of anisotropic micropolar elastic cylinders, ZAMM, **54** (1974), 773-779.

43. Thermal stresses in micropolar elastic cylinders, Acta Mechanica, **21** (1975), 261-272.

44. Saint-Venant's problem for inhomogeneous and anisotropic solids, J. Eng. Math., **9** (1975), 281-290.

45. Thermal stresses in inhomogeneous elastic cilinders, Mech. Res. Comm., **2** (1975), 125-129.

46. Saint-Venant's problem for inhomogeneous bodies, Int. J. Eng. Sci., **14** (1976), 353-360.

47. Saint-Venant's problem for heterogeneous anisotropic elastic solids. Ann. Mat. Pura Appl. (IV), **108** (1976), 149-159.

48. Saint-Venant's problem for inhomogeneous and anisotropic elastic bodies. J. Elasticity, **6** (1976), 277-294.

49. Saint-Venant's problem for heterogeneous elastic solids, Rozpr. Inzyn., **24** (1976).

50. Reciprocal theorems and variational theorems in nonlocal elastodynamics, Int. J. Engng. Sci., **15** (1977), 693-699.

51. Saint-Venant's problem for inhomogeneous and anisotropic elastic solids with microstructure, Archives of Mechanics, **29** (1977), 419-430.

52. Saint-Venant's problem for inhomogeneous and anisotropic Cosserat elastic solids, ZAMM, **58** (1978), 95-99.

53. Thermal stresses in composite Cosserat elastic cylinders, J. Thermal Stresses, **1** (1978), 149-162.

54. Deformation of composed Cosserat elastic cylinders. Rev. Roum. Sci. Techn. Mec. Appl., **23** (1978), 823-845.

55. On the changes in the Earth's inertia tensor due to earthquake faulting, An. St. Univ. Iaşi, **25** (1979), Supliment, 53-61.

56. Thermal stresses in composite cylinders, J. Thermal Stresses, **3** (1980), 495-508.

57. Incremental equations in thermoelsticity. J. Thermal Stresses, **3** (1980), 41-56.

58. Torsion problem in the theory of non-simple elastic materials, An. St. Univ. Iaşi, Matematica, **27** (1981), Supliment, 167-172.

59. Thermoelastic stresses in initially stressed bodies with microstructure, J. ThermalStresses, **4** (1981), 387-406.

60. Some applications of micropolar mechanics to earthquake problems, Int. J. Engng. Sci., **19** (1981), 855-864.

61. On the first strain-gradient theory of elastodynamics, An. St. Univ. Iaşi, Matematica, **28** (1982), Supliment, 77-85.

62. Some theorems in a grade consistent micropolar theory of elasticity, ZAMM, **62** (1982), 35-41.

63. Torsion problem for non-simple Cosserat elastic materials, Bull. Acad. Polon. Sci., Ser. sci. techn., **30** (1982), 111-119.

64. Thermoelasticity of nonsimple materials, J. Thermal Stresses, **5** (1983), 151-172.

65. On the energy release rate in thermoelastodynamics crack propagation, An. St. Univ. Iaşi, s. I-a Matematica, **30** (1984), 1, 91-96.

66. On the crack propagation in micropolar elastic solids, Int. J. Engng. Sci., **22** (1984), 547-555.

67. The grade consistent theory of micropolar thermoelasticity, Rev. Roum. Sci. Techn., Ser. Mec. Appl., **30** (1985), 3-19.

68. Some theorems in the theory of elastic materials with voids. J. Elasticity, **15** (1985), 215-224.

69. Shock waves in micropolar elastic materials with voids, An. St. Univ. Iaşi, s. I-aMatematica, **31** (1985), 177-186.

70. Thermal stresses in heterogeneous anisotropic Cosserat elastic cylinders, J. ThermalStresses, **8** (1985), 385-397.

71. A theory of thermoelastic materials with voids, Acta Mechanica, **60** (1986), 67-89.

72. On generalized Saint-Venant's problems, Int. J. Engng. Sci., **24** (1986), 849-858.

73. On Saint-Venant's problem, Arch. Rational Mech. Anal., **91** (1986), 363-373.

74. On the solution of a problem of Truesdell's, An. St. Univ. Iaşi, s. I-a Matematica, **32** (1986), 95-103.

75. Generalized twist for the torsion of micropolar cylinders, Meccanica, **21** (1986), 94-96.

76. On the theory of uniformly loaded cylinders, J. Elasticity, **16** (1986), 375-382.

77. A theory of initially stressed thermoelastic materials with voids, An. St. Univ. Iaşi, s. I-a Matematica, **33** (1987), 167-184.

78. Continuous dependence and uniqueness results in nonlinear theory of elastic materialswith voids, Rev. Roum. Sci. Techn. Mec. Appl., **32** (1987), 351-363.

79. Plane strain problems in piezoelectricity, Int. J. Engng. Sci., **25** (1987), 1511-1523.

80. Initially stressed thermoelastic dielectrics, J. Thermal Stresses, **11** (1988), 421-441.

81. Thermoelasticity of initially heated bodies, J. Thermal Stresses, **11** (1988), 17-39.

82. On some theorems in thermoelastodynamics, Rev. Roum. Sci. Techn. Mec. Appl., **34** (1989), 101-111.

83. Some theorems in the theory of thermoelasticity, (with A. Scalia), J. ThermalStresses, **12** (1989), 225-239.

84. On Saint-Venant's problem for elastic dielectrics, J. Elasticity, **21** (1989), 101-115.

85. Reciprocity, uniqueness and minimum principles in the dynamic theory of thermoelasticity, J. Thermal Stresses, **12** (1989), 465-482.

86. On some theorems in thermopiezoelectricity, J. Thermal Stresses, **12** (1989), 209-224.

87. Reciprocity, uniqueness and minimum principles in the linear theory of piezoelectricity, Int. J. Engng. Sci., **28** (1990), 1139-1149.

88. On uniqueness and continuous dependence in nonlinear thermodynamics of electromagnetic materials, Quart. Appl. Math., **48** (1990), 85-84.

89. Reciprocity, uniqueness and minimum principles in elastodynamics, An. St. Univ. Iași, Matematica, **36** (1991), 175-181.

90. On the theory of mixtures of thermoelastic solids, J. Thermal Stresses, **14** (1991), 389-408.

91. Some theorems in the theory of nonsimple elastic bodies, (with R. Quintanilla), An. St. Univ. Iași, Matematica, **37** (1991), 113-124.

92. A theory of thermoviscoelastic dielectrics, (with M. Ciarlleta), J. Thermal Stresses, **14** (1991), 589-606.

93. On the grade consistent theory of micropolar thermoelasticity, (with R. Quintanilla), J. Thermal Stresses, **15** (1992), 393-418.

94. A theory of mixtures of nonsimple elastic solids, Int. J. Engng. Sci., **30** (1992), 317-328.

95. Saint-Venant's problem for microstretch elastic solids, (with L. Nappa), Int. J. Engng. Sci., **32** (1994), 229-236.

96. On the theory of mixtures of elastic bodies, J. Elasticity, **35** (1994), 251-268.

97. Existence and continuous dependence results in the theory of microstretch elasticbodies, (with R. Quintanilla), Int. J. Engng. Sci., **32** (1994), 991-1001.

98. A theory of mixtures of nonsimple fluids, Int. J. Engng. Sci., **32** (1994), 1423-1436.

99. On the stability of motions of thermoelastic fluids, J. Thermal Stresses, **17** (1994), 409-419.

100. Existence and continuous dependence results in the theory of interacting continua, (with R. Quinanilla), J. Elasticity, **36** (1994), 85-98.

101. On the equilibrium theory of microstretch elastic solids, (with A. Pompei), Int. J. Engng. Sci., **33** (1995), 399-410.

102. Extension and bending of microstretch elastic circular cylinders, (with L. Nappa), Int. J. Engng. Sci., **33** (1995), 1139-1151.

103. Decay estimates and energy bounds for porous elastic cylinders, (with R. Quintanilla), ZAMP, **46** (1995), 268-281.

104. On the theory of bubbly fluids, Int. J. Engng. Sci., **33** (1995), 1853-1860.

105. Existence theorems in the theory of mixtures, J. Elasticity, **42** (1996), 145-163.

106. Uniqueness results in the theory of microstretch fluids, Int. J. Engng. Sci., **35** (1997), 669-679.

107. Some properties of solutions in dynamical theory of mixtures, (with L. Nappa)., Mathematics and Mechanics of Solids, **2** (1997), 351-360.

108. A theory of mixtures with different constituent temperatures, J. Thermal Stresses, **20** (1997), 147-167.

109. On Saint-Venant's principle for microstretch elastic bodies, (with A. Scalia), Int. J. Engng., **35** (1997), 1277-1290.

110. Some results in the dynamical theory of porous elastic bodies (with M. Ciarletta), J. Elasticity, **50** (1998), 3-14.

111. On the theory of thermoelasticity without energy dissipation, J. Thermal Stresses, **21** (1998), 295-307.

112. On the problem of propagation of heat in mixtures (with R. Quintanilla), Appl. Mechanics and Engineering, **4** (1999), 529-551.

113. Thermal stresses in heterogeneous elastic cylinders with microstructure, J. ThermalStresses, **22** (1999), 371-385.

114. A theory of nonsimple microstretch fluids, (with R. Quintanilla), An. St. Univ. Iași, Matematica, **46** (2000), 171-194.

115. On a theory of thermoelasticity with microtemperatures, (with R. Quintanilla), J. Thermal

Stresses, **23** (2000), 199-217.

116. On the plane strain of microstretch elastic solids, (with L. Nappa), Int. J. Engng. Sci., **39** (2001), 1815-1835.

117. Extremum principles and existence results in micromorphic elasticity (with L. Nappa), Int. J. Engng. Sci., **39** (2001), 2051-2070.

118. On a theory of micromorphic elastic solids with microtemperatures, J. ThermalStresses, **24** (2001), 737-752.

119. On the micromorphic thermoelasticity, Int. J. Engng. Sci., **40** (2002), 549-568.

120. On the theory of heat conduction in micromorphic continua, Int. J. Engng. Sci., **40** (2002), 1859-1878.

121. On a theory of interacting continua with memory, (with R. Quintanilla), J. ThermalStresses, **25** (2002), 1161-1178.

122. Axially-symmetrical problems in porous elastic bodies, (with L. Nappa), Int. J. Solids and Structures, **43** (2003), 5271-5286.

123. On complex potentials in the theory of microstretch elastic bodies, (with A. Scalia), Int. J. Engng. Sci., **41** (2003), 1989-2004.

124. Superposed linear deformations on finite deformations of elastic materials withvoids, (with A. Scalia), Memoirs of Scientific Sections of Romanian Academy, **26** (2003), 1-26.

125. Thermal stresses in plane strain of porous elastic bodies, (with L. Nappa), Meccanica, **39** (2004), 125-138.

126. On the plane strain of thermo-microstretch elastic solids (with R. Quintanilla), Int. J. Engng. Sci., 42 (2004), 1957-1972.

127. On the nonlinear theory of interacting micromorphic materials, Int. J. Engng. Sci., 42 (2004), 2135-2145.

128. On the theory of viscoelastic mixtures, J. Thermal Stresses 27 (2004), 1125-1148.

129. On the theory of heat for micromorphic bodies (with L. Nappa), Int. J. Engng. Sci., **43** (2005), 17-32.

130. Thermal stresses in microstretch elastic plates (with R. Quintanilla), Int. J. Engng. Sci., **43** (2005), 885-901.

131. Second-order effects in the torsion of elastic materials with voids, ZAMM, **85** (2005), 351-362.

132. Method of complex potentials in linear microstretch elasticity (with L. Nappa), Int. J. Engng. Sci. **44** (2006), 797-806.

133. On the microstretch piezoelectricity, Int. J. Engng. Sci. **44** (2006), 819-829.

134. Propagation of singular surfaces thermo-microstretch continua with memory (withA. Scalia), Int. J. Engng. Sci. **44** (2006), 845-858.

135. Nonlinear plane strain of elastic materials with voids, Mathematics and Mechanicsof Solids, **11** (2006), 337-360.

136. Continuous dependence in a nonlinear theory of viscoelastic porous mixtures, Int. J. Engng. Sci. **44** (2006), 1127-1145.

137. On the deformation of inhomogeneous orthotropic elastic cylinders (with R. Quintanilla), European Journal of Mechanics A/Solids **26** (2007), 999-1015.

138. A theory of thermoviscoelastic composites modeled as interacting Cosserat continua, J. Thermal Stresses **30** (2007), 1269-1289.

139. Thermoelasticity of bodies with microstructure and microtemperatures Int. J. Solidsand Structures **44** (2007), 8648-8662.

140. On the theory of loaded inhomogeneous cylinders (with L. Nappa), Mech. Res. Comm., **34** (2007), 136-144.

141. Some theorems in the theory of microstretch thermopiezoelectricity, (with R. Quintanilla), Int. J.

Eng. Sci., **45** (2007), 1-16.

142. On the deformation of functionally graded porous elastic cylinders, (withA. Scalia), J. Elasticity **87** (2007), 147-159.

143. A theory of porous thermoviscoelastic mixtures (with R. Quintanilla), J. ThermalStresses **30** (2007), 693-714.

144. Thermal stresses in inhomogeneous porous elastic cylinders, J. Thermal Stresses**30** (2007), 145-164.

145. Generalized torsion of elastic cylinders with microstructure, Note di Matematica**27** (2007), 121-131.

146. A theory of prestressed thermoelastic Cosserat continua, ZAMM Zeitschrift furAngewandte Mathematik und Mechanik. **88** (2008), 306-319.

147. Thermopiezoelectricity without energy dissipation, Proceedings of the Royal Society A, **464** (2008), 631-656.

148. On the bending of piezoelectric plates with microstructure, Acta Mechanica **198** (2008), 191-208.

149. Thermoelastic deformation of porous Cosserat beams, J. Thermal Stresses **31** (2008), 823-847.

150. On the theory of viscoelastic mixtures and stability (with L. Nappa), Mathematicsand Mechanics of Solids, **13** (2008), 55-80.

151. Thermal effects in orthotropic porous elastic beams, ZAMP, **60** (2009), 138-153.

152. On the thermoelastic bodies with inner structure and microtemperatures (withR. Quintanilla), J. Math. Anal. Appl. **354** (2009), 12-23.

153. Binary mixtures of elastic solids with microstructure, Mathematics and Mechanicsof Solids, **14** (2009), 564-586.

154. Porous elastic beams reinforced by longitudinal rods (with A. Scalia), ZAMP **60** (2009), 1156-1177.

155. Singular surfaces in the theory of thermoelasticity with microtemperatures, J. Thermal Stresses, **32** (2009), 1279-1292.

156. Deformation of orthotropic porous elastic bars under lateral loading, Archives ofMechanics, **62** (2010), 3-20.

157. Torsion of chiral Cosserat elastic rods, European Journal of Mechanics-A/Solids, **29** (2010), 990-997.

158. Thermal effects in chiral elastic rods, Int. J. Thermal Sciences, **49** (2010), 1593-1599.

159. Plane deformation of elastic bodies with microtemperatures (with A. Scalia), Mech. Res. Comm. **37** (2010), 617-621.

160. Chiral effects in uniformly loaded rods, J. Mech. Phys. Solids, **58** (2010), 1272-1285.

161. On the deformation of orthotropic Cosserat elastic cylinders (with A. Scalia), Mathematics and Mechanics of Solids, **16** (2011), 177-199.

162. Prestressed composites modeled as interacting solid continua, Nonlinear Analysis:Real World Applications, **12** (2011), 513-524.

163. Deformation of porous Cosserat elastic bars, Int. J. Solids Structures, **48** (2011), 573-583.

164. Pressure vessel problem for chiral elastic tubes, Int. J. Eng. Sci. **49** (2011), 411-419.

165. On a theory of thermoviscoelastic mixtures (with A. Scalia), J. Thermal Stresses**34** (2011), 228-243.

166. On the grade consistent theories of micromorphic solids, American Institute ofPhysics, Conference Proceedings vol. **1329** (2011), 130-149.

167. Thermal stresses in chiral elastic beams, J. Thermal Stresses **34** (2011), 458-487.

168. On a theory of thermoviscoelastic materials with voids, J. Elasticity, **104** (2011) 369-384.

169. Micromorphic elastic solids with initial stresses and initial heat flux, Int. J. Eng. Sci. **49** (2011), 1350-1356.

170. Two-dimensional heat conduction in thermodynamics of continua with microtemperature distributions (with R. Quintanilla), International Journal of Thermal Sciences, **55** (2012), 48-59.

171. On the torsion of inhomogeneous and anisotropic bars, Mathematics and Mechanicsof Solids, **17** (2012), 848-859.

172. A theory of chiral Cosserat elastic plates, (with S. De Cicco), Journal of Elasticity, **111** (2013), 245-263.

173. Deformation of chiral rods in the strain gradient theory of thermoelasticity, EuropeanJournal of Mechanics-A/Solids, **37** (2013), 351-360.

174. Non-linear deformations of porous elastic solids, (with R. Quintanilla), InternationalJournal of Non-Linear Mechanics, **49** (2013), 57-65.

175. On the torsion of chiral bars in gradient elasticity, Int. J. Solids Structures, **50** (2013), 588-594.

176. On a strain gradient theory of thermoviscoelasticity (with R. Quintanilla), Mechanics Research Communications **48** (2013), 52-58.
